† The advisor has contractually agreed to waive fees and/or reimburse expenses of the Fund through 31 December 2013. The agreement may only be terminated by the Fund's Board of Trustees on 60 days' written notice.

‡ Standard Deviation is calculated based on log of daily total returns and annualized by multiplying it by the square root of the number of trading days in the year. Beta, Alpha and R-Squared are calculated using the log of daily price changes of ETNHX and the S&P 500 Total Return Index (the Index). Beta for each period is the covariance divided by the Index variance for that period. Alpha is the period's ETNHX price return minus Beta times the Index price return. R-Squared is the square of the correlation of the daily log returns of ETGLX and the Index.

\*\* Sector Allocation is subject to change at any time. Past performance does not assure future results.

†† Companies valued at greater than \$10 billion are Large Cap; those at less than \$1 billion are Small Cap. Portfolio Composition is subject to change at any time. Past performance does not assure future results.

‡‡ Annualized since inception returns assume an inception date of 27 December 2012.

Mutual Funds involve risk including the possible loss of principal.

**Past performance does not guarantee future results.** The fund can invest in smaller-sized companies which may experience higher failure rates than larger companies normally have a lower trading volume than larger companies. The Fund's ethical values screening criteria could cause it to under perform similar funds that do not have such screening criteria. The fund can have risk associated with the biotechnology and pharmaceutical industry in which these companies may be heavily dependent on clinical trials with uncertain outcomes and decisions made by the U.S. Food and Drug Administration. The fund can have risk related to option investing. There are special risks associated with investments in foreign companies including exposure to currency fluctuations, less efficient trading markets, political instability and differing auditing and legal standards. The fund can have risk associated with a higher portfolio turnover which could result in higher transactional costs. Investors should consider the Fund's objectives, risks, charges and expenses carefully before investing or sending money. This and other important information about the Eventide Healthcare & Life Sciences Fund can be found in the fund's prospectus. Please read the prospectus carefully before investing.
